

SANI 400 WIFI

The name says it all, Sani, the Sani 400 infrared heating for the bathroom has been specially developed to be able to hang in the bathroom. The Sani 400 infrared heater has a maximum power of 400 Watt. This infrared panel provides wonderful direct heat thanks to the infrared radiation. The instant warmth is wonderful when you just get out of the shower and feels like a warm blanket. We also provide a warm towel, because this infrared heater also has two stainless steel brackets. For example, you can hang the towel over it, which will then be wonderfully warm when you turn it over.

The Sani 400 infrared heating can be operated with the free Eurom Smart App. So you no longer have to have the heating on in the bathroom all day long. Before entering the bathroom, turn on the infrared panel or use the timer in the App. So it is wonderfully warm when you enter the bathroom.

The Sani 400 infrared heating for the bathroom is also available in [black](#). Prefer a bathroom heater with a little more power? Then view the [Sani 600 Wifi](#) or the [Sani 800 Wifi](#).

Product number	350067
EAN	8713415350067
Powered by	electric
Power	400 W
Connection voltage	220-240/50 V/Hz
Element	carbon crystal
