KRT706510 LASER DISTANCE METER 60m

Do not measure long distances and large spaces inaccurately any more with measuring tape or folding rulers. This Kreator laser distance meter records distances up to 60 metres accurate to 2mm. It shows moreover the angle in which you work, so you always measure level. Very practical to realise complex angle calculations. The dust and splash water-proof device has an area and a volume function, as well as a Pythagorean measuring function and is able to add and subtract effortlessly. It is easy to calculate the amount of paint necessary to paint a room or how much space you have to place your furniture. Various forms are measurable too: with the rectangle function for instance you know immediately the dimensions for your roller blind. Fix the laser distance meter even more stable on a tripod, like the KRT706900.

2 AAA batteries included.
